Oracle Cloud Data Management 2023 Certified Foundations Associate

Issued by Oracle

The Oracle Cloud Data Management Foundations certification is intended for individuals looking to demonstrate fundamental knowledge of data management services provided by Oracle. This certification is targeted towards candidates with non-technical backgrounds such as those involved in selling or procuring cloud solutions, as well as those with a technical background who want to validate their foundational-level knowledge around core Oracle Data Management services. This exam does not require any hands-on technical experience and is not a prerequisite for taking any other Oracle certifications.

Expiration Date: February 19, 2026

Skills

- Discuss Oracle Cloud Data Management Principles
- Explain Oracle Free Tier Accounts
- Describe Autonomous Database tools and Instance Creation
- Describe Exadata Use Cases and Business Problems
- Describe MySQL and NoSQL services
- Explain Resiliency
- Discuss concepts and uses of OCI Analytics and AI Data Services
- Explain Migration and Upgrade options
